Ascom Telligence®
The Patient Response System

Bringing together clinical information for more responsive patient-centric care

Telligence from Ascom is the world’s first Patient Response System. With Telligence, caregivers now have relevant information at the point of care and throughout the care process. Built on the Ascom Healthcare Platform that collects information from multiple sources (the patient, medical devices, healthcare applications and other systems), Telligence gives clinicians a more comprehensive view of the patient’s status that goes well beyond traditional nurse call. As a result, caregivers are better informed when responding to patient requests.
Ascom Telligence and New TelliConnect Station

Ascom TelliConnect Station provides access to relevant information at the point of care, and access to Ascom applications like TaskMinder, Charting and MDI, so patient needs are handled promptly. This patient-centric solution makes the following possible:

**Optimized Communication**
Captures and shares information from multiple sources to enable faster response times, while empowering the patient to control their own environment.

**Automated Staff Check-In**
Recognizes staff presence at the bedside and in clinical care areas, so caregivers can focus on their patients.

**Efficient Clinical Workflows**
Enables the centralized creation, management and tracking of tasks, staff workflow improvements and monitoring as a way of increasing positive patient experiences.

**Scalable and Flexible Design**
Allows a modular approach to adopting The Patient Response System and customized solutions for unique healthcare needs ... all with a modern hardware design.

**Quick Charting**
Streamlines documentation to enable faster EHR updates and more time with the patient, while also eliminating duplication.

**Medical Devices Integration**
Accesses clinical information from third-party medical devices with instant pairing and wide compatibility to collect key decision-making insights.

The Ascom Healthcare Platform solutions are designed to integrate, orchestrate and enable aligned end-to-end digital clinical information and workflows between systems, people and devices at virtually any point of care. Representing applications, services, devices and smartphones, the Platform and Ascom Telligence enable seamless access, sharing and tracking of information across clinical teams.

---

*Nurse Rounding Recognition*

*Nurse Rounding Recognition* is a feature that recognizes staff presence at the bedside and in clinical care areas, allowing caregivers to focus on their patients.

*Patient Device Monitoring*

*Patient Device Monitoring* is a feature that enables the centralized creation, management and tracking of tasks, staff workflow improvements and monitoring as a way of increasing positive patient experiences.

*Devices shown are representations only and do not reflect actual devices.*
Four key ways Ascom Telligence bridges clinical gaps for more informed patient care

Ascom Telligence is a modular, scalable patient response system. It seamlessly integrates with your current devices and applications, and can easily be expanded over time to meet future requirements.

Ascom Telligence is flexible...offering everything from a standalone nurse-call system to fully integrated, end-to-end patient response solutions. Whatever you choose, each Ascom Telligence module provides a solid foundation for ongoing patient response improvements.

1. Get more value out of your information and investment
   The system leverages the required nurse call infrastructure and enhances it with communication and documentation tools.

2. Obtain important details for informed decisions
   Provides a portal to the patient record and other information to help clinicians make informed decisions.

3. Easy access to key clinical content
   Digital information derived from applications, devices and systems is made accessible for faster visibility of patient needs.

4. Easy, precise documentation
   Allows key information to be captured at the bedside for better information collection that translates into more efficient care.

About Our Company

Ascom is a global solutions provider focused on healthcare Information and Communication Technology (ICT) and mobile workflow solutions. The vision of Ascom is to close digital information gaps allowing for the best possible decisions — anytime and anywhere. Ascom’s mission is to provide mission-critical, real-time solutions for highly mobile, ad hoc, and time-sensitive environments. Ascom uses its unique product and solutions portfolio and software architecture capabilities to devise integration and mobilization solutions that provide truly smooth, complete and efficient workflows for healthcare as well as for industry, security and retail sectors. Ascom is headquartered in Baar, Switzerland, has subsidiaries in 15 countries and employs around 1,300 people worldwide. Ascom registered shares (ASCN) are listed on the SIX Swiss Exchange in Zurich.
