

ASCOM (US) INC. COMPLETE ON-SITE WIRELESS COMMUNICATIONS SOLUTIONS.

Ascom is the Americas' market leading developer of workplace wireless communication solutions providing system users with greater freedom of movement, better service and increased safety. Our research and development focuses on products and solutions for our core business of on-site wireless communication. We are committed to providing the Americas with products that are unique, durable and innovative.

Technology Overview

Ascom VoWiFi System

The robust Ascom VoWiFi standards based solution consists of market-specific WLAN portable handsets, advanced messaging, VoIP Gateways for integration with existing circuit-switched PBXs and supports IEEE 802.11b/g/e/i standards.

Ascom IP-DECT System

The dependable Ascom IP-DECT System utilizes industry standard TDM and VoIP telephony interfaces to provide a fully integrated wireless communication platform. This IP-DECT solution consists of two system types: IP-DECT base stations (wireless VoIP) or the IP-DECT Gateway (dedicated wired/wireless). Both solutions are modular and expandable.

Ascom Portable Handsets

Rugged Ascom handsets offer the professional worker a powerful communication tool packed with feature-rich applications that improve efficiency in demanding environments. These handsets provide three programmable soft keys and four-way navigation to ensure the most important functions are always readily available. Ascom phones also feature a hands-free speaker mode, large display, vibration alert and long battery life. Equipped with a push button alarm for instant team communication, Ascom handsets have additional optional personal security and alarm features such as the ATEX/CSA certification of the EX model.

Unite Professional Messaging Suite

The Ascom Unite Messaging Suite provides select Ascom handsets with two-way messaging, user originated data and mobile alarms. All messaging activities are recorded, providing real-time activity logging for complete audit trail records and reporting.

Distribution

Ascom products are sold primarily through a network of distributors and partners throughout North America.
