

THE POWER OF ONE
MISSION CRITICAL HOSPITAL
COMMUNICATION SOLUTION

The Power of One

Ascom is the first and only company to offer a complete nurse call, messaging middleware, and wireless communication solution, all from a single manufacturer. We call this The Power of One. It allows hospitals to focus on what they do best, caring for patients, while utilizing an intuitive and dependable clinical communication solution.

Ascom Telligence is a clinical communication, workflow, reporting, and alert system that links patients to caregivers.

With financial challenges becoming a top concern for hospital administrators, improved clinical communication becomes increasingly important as it positively impacts HCAHPS scores and drives efficiency improvements that lead to increased revenue and improved profitability. Disparate systems from different manufacturers can limit the flexibility and effectiveness of integrating nurse call systems with wireless devices.

With hundreds of different possible combinations among separate nurse call, messaging middleware, and mobility manufacturers, hospitals face at least two serious challenges with an increasingly complex set of applications available in today's marketplace:

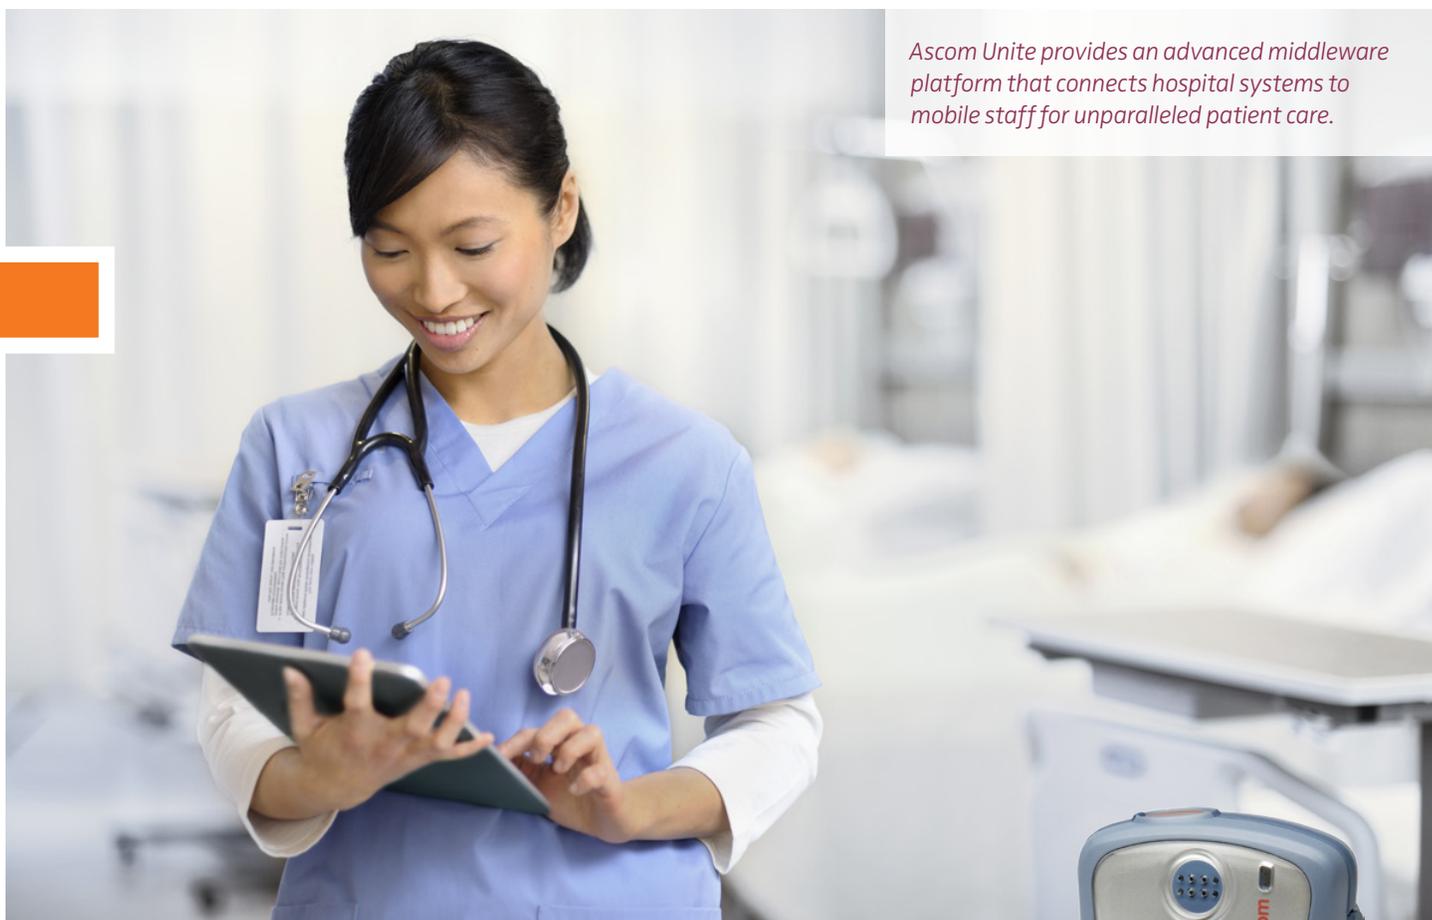

- Maintaining seamless interoperability
- Ensuring uninterrupted operation of patient/staff communications

Ascom's complete nurse communication solution, including the Telligence Nurse Call System, Unite Messaging Suite, and wireless voice systems, helps minimize interoperability risks and ensures end-to-end functionality. This tightly integrated combination of Ascom products assures fast, reliable, and uninterrupted communication between patients and staff. Ascom's Power of One design and integration philosophy provides a more consistent and powerful solution for its healthcare customers. One manufacturer. One experience. One solution.

Innovative Solution Features

Ascom innovation begins with input from a cross section of hospital staff as our developers consider new and innovative features that enable simple and intuitive communication. As solutions are created and defined, we continually seek hospital feedback as a critical part of the development process.

- Innovations extend across nurse call, messaging middleware, and wireless voice and messaging devices
- Product design is focused on creating a more efficient workflow
- Safer and better patient care is the end goal

Ascom Unite provides an advanced middleware platform that connects hospital systems to mobile staff for unparalleled patient care.

Seamless Integration

Simplifying healthcare processes means that nurse staff stations, staff consoles, and wireless devices need to perform in unison and have consistent designs. With The Power of One, Ascom is able to not only meet specifications, but also design more consistent interfaces across the entire solution, ensuring better performance in various hospital environments.

- Consistent interface and design for a common look and feel across the entire nurse call communications portfolio
- Nearly instantaneous response for faster decision making
- Simplified learning curve yields quicker adoption by users

Timeless Interoperability

With its long history of ensuring interoperability, Ascom is aware of the complexities involved when attempting to bridge functionality across many vendor platforms with varying software releases.

Nurse call systems have an average life span of 10-15 years while wireless devices have much shorter product lifecycles as technology drives new features.

- Ascom's integrated design and testing across the portfolio reduces the possibility of an issue in the hospital environment
- Testing encompasses old and new releases to ensure software upgrades can be implemented without issue

Experience The Power of One

The Power of One allows hospitals to confidently deploy a feature rich, fully integrated, and highly reliable clinical communication solution from a single manufacturer. Visit us at www.ascom.us or call 877-71ASC0M today to discuss how your facility can benefit from Ascom's unique combination of nurse call, wireless voice, and messaging solutions.

Purpose-built Ascom IP-DECT and VoWiFi handsets provide voice and messaging communication anywhere on-site.

ONLY ASCOM GIVES YOU THE POWER OF ONE

Let the complete solution provider take the headache out of hospital communications.

Telligence Nurse Call
Workflow, reporting and alerts
between patient, and care giver.

Unite Middleware
Puts the critical information you
need in the palm of your hand.

IP-DECT or VoWiFi

Purpose-built personal communication
devices with voice and messaging.

Ascom is the Americas' market leading developer of workplace wireless communication solutions providing system users with greater freedom of movement, better service, and increased safety. Our research and development focuses on products and solutions for our core business of on-site wireless communication. We are committed to providing the Americas with products that are unique, durable, and innovative.
