

ASCOM (US) INC. YOUR COMPLETE ON-SITE WIRELESS COMMUNICATIONS PROVIDER.

Ascom is the Americas' market leading developer of workplace wireless communication solutions providing system users with greater freedom of movement, better service and increased safety. Our research and development focuses on products and solutions for our core business of on-site wireless communication. We are committed to providing the Americas with products that are unique, durable and innovative.

Technology Overview

Ascom FreeNET system

The robust Ascom FreeNET VoWiFi standards based solution consists of market-specific WLAN portable handsets, advanced messaging, VoIP Gateways for integration with existing circuit-switched PBXs and supports IEEE 802.11b/g/e/i standards.

FreeNET VoWiFi Handsets

The rugged i75 Medic, Protector and Messenger handsets provide three programmable soft keys and four-way navigation to ensure the most important functions are always readily available for ease of use. These handsets also feature a hands-free speaker mode, large display, vibration alert and long battery life. They are capable of sending and receiving 2-way messages and can be viewed with an optional inverted text option. Equipped with a push button alarm for instant team communication, the i75 Protector and Medic handsets have additional optional personal security and alarm features.

Ascom Freeset IP-DECT System

The Freeset IP-DECT System utilizes industry standard TDM and VoIP telephony interfaces to provide a fully integrated wireless communication platform. The Freeset IP-DECT solution consists of two system types: IP-DECT base stations (wireless VoIP) or the IP-DECT Gateway (dedicated wired/wireless). Both solutions are modular and expandable.

Freeset IP-DECT Handsets

The new Freeset platform supports a highly versatile wireless handset portfolio: the d41, the d62, the 9d24 and the 9d24 EX. The basic d41 and 9d24 Messenger are ideal for constant daily use. The d62 and 9d24 offer the professional worker a powerful communication tool packed with feature-rich applications that improve efficiency in demanding environments. The 9d24 EX variants are the world's only ATEX and CSA approved handsets.

UNITE Professional Messaging Suite

The Ascom UNITE Messaging Suite provides select Ascom handsets with two-way messaging, user originated data and mobile alarms. The message is instantly displayed allowing quick and accurate response. All messaging activities are recorded in the Ascom Communications Server providing real-time activity logging for complete audit trail records and reporting.

Distribution

Ascom products are sold primarily through a network of Platinum Premier Distributors and Certified Solution Partners located throughout North and Latin America.
