

Product: BS-330/IPBS base stations

Purpose: Narrow ceiling grid clips

Date: June 26, 2009

Narrow ceiling grid clips for mounting BS330/IPBS base stations

Background

There is a kit that Ascom supplies for mounting BS330 base stations to a drop ceiling grid, NTM2011754. This kit comes with **two** ceiling mount clips that are suitable for a standard ceiling grid that is made of 15/16" grids. If the ceiling grid is made of smaller 9/16" grids, these clips will not work.

Affected equipment

BS330/IPBS base stations.

Solution

The company that makes the 15/16" clips that Ascom supplies in the kit also make a clip for the smaller, 9/16", ceiling grids. These can be purchased from the manufacturer, Cooper B-Line. The part number for the smaller size clips is BA-4-9-W. The Cooper B-Line web site is, Cooper B-Line.com.

To use the smaller clips, remove the existing clips from the ceiling mount and replace them with the new clips.

Additional Information
